## **Downtown High School**

## On-Site Assessment for Downtown High School

2022 www.safehavensinternational.org

Part 1 Team Leader: Russell Bentley

Date: 05/10/2021

Name of School: **Downtown High School**

School System: San Francisco Unified School District

Address of School: 693 Vermont Street, San Francisco, CA 94107

**Observation for Vaping Mitigation & Prevention****Russell Bentley****05/10/2021****1. Signage and posters**

Question	Answer	Comments
<b>1.1.1</b> Are there any signage and/or posters in the school regarding an anonymous reporting mechanism so students can report concerns about vaping?	No	There is no signage and/or posters in the school regarding an anonymous reporting mechanism.
<b>1.1.2</b> Other notes/comments	The analyst did not observe any signage and or posters however there are several hotlines and numbers the district has published for student/parent to resort a number of issues. The SFUSD Student and Family Resource Link is a new project to help families navigate all of the SFUSD resources available to them during distance learning for the rest of the school year. There is a an area where students are parents can file a concern on Safety Concerns/Title IX issues.

## 2. Camera

**1.2.1** If the school has surveillance cameras, please take photos of camera feeds on computer screen to determine the number of cameras at the school. (Clarification: The purpose of this is to help us more accurately determine how many cameras are in use and working at each school.)

There are 42 cameras located throughout the campus. The image quality is inadequate to identify faces but the staff reported they typically can identify a student by their clothing.

On-Site Assessment for Downtown High School

**1.2.2** Other notes/comments

The campus has both interior and exterior video camera coverage. There are still a number of areas additional camera coverage might assist a limited number of security and administrative staff with student supervision.

## On-Site Assessment for Downtown High School

## 3. Does the school have the following:

Question	Answer	Comments
----------	--------	----------

## On-Site Assessment for Downtown High School

Question	Answer	Comments
<b>1.3.1</b> "Walking only" zones? (Clarification: A "Walking Only zone" is a designated physical space/area where students are allowed to move through but prohibited from stopping, gathering or loitering during specific time periods.)	No	
<b>1.3.2</b> Designation of "No Go" zones during certain times of day? (Clarification: A "No Go zone" is a designated physical space/area where students are not allowed to enter or pass through during specific time frames.)	Yes	The staff reported the stairwells to gym, teacher's lounge , and the area behind the stage in the cafeteria are considered "No Go Zones".

## On-Site Assessment for Downtown High School

Question	Answer	Comments
		
		
		
<b>1.3.3</b> Student restrooms with doors removed to create improved supervision?	No	Most of the restroom door were closed and some restroom are only during the lunch period (T-61 and T-51). A few restroom doors were propped open. The student restrooms have lockable stall doors.

## On-Site Assessment for Downtown High School

Question	Answer	Comments
  		
1.3.4 Restrooms with a "lazy S" entryway?	No	Restrooms don't have this type of entry. Most of rest rooms are constructed where when one walks in, there is not an obstructed view.

## On-Site Assessment for Downtown High School

Question	Answer	Comments
		
1.3.5 Other notes/comments		

## 4. Magnetic holdbacks

Question	Answer	Comments
1.4.1 Are there any stairwell doors that do not have magnetic holdback devices which allow the doors to be propped open to increase natural surveillance for the stairwell areas while still in compliance with fire code?	No	The analyst observed all stairwell doors had magnetic holdbacks devices and they were functioning properly.

## On-Site Assessment for Downtown High School

Question	Answer	Comments
		
		
<b>1.4.2</b> Are there any hallway fire doors that do not have magnetic holdback devices which allow the doors to be propped open to increase natural surveillance for hallway areas while still in compliance with fire code?	No	

## On-Site Assessment for Downtown High School

Question	Answer	Comments
		
1.4.3 Other notes/comments		

## 5. "Red flag" locations

Question	Answer	Comments
1.5.1 Did you find any unusual "red flag" locations that your experience and training indicate that we should be aware of? If yes, please describe. (Clarification: In this usage, red flag locations are those unusual or unique areas where the supervision of students can be difficult)	No	The area at the rear of the stage and multipurpose room. if unsupervised students gain access to this are during lunch or others time of the day, they have several rooms and a hallway to hid and vape .

## On-Site Assessment for Downtown High School

Question	Answer	Comments
		
		
		
<b>1.5.2 Other notes/comments</b>		The school might consider adding additional video camera coverage and keep the storage area locked and checked on a regular basis.

**6. In addition to areas identified by administrators, based on your experience, did you find any other locations where students are likely to relocate?**

## On-Site Assessment for Downtown High School

Question	Answer	Comments
1.6.1 Restrooms	Yes	Staff reported that vaping devices have been found in seat covering holders, and in the cover for the water main valve.

On-Site Assessment for Downtown High School

Question	Answer	Comments
		
		

## On-Site Assessment for Downtown High School

Question	Answer	Comments
1.6.2 Hallways	Yes	The hallways do have camera coverage but because the hallways are so long the cameras are unable to capture a quality picture with the current camera system. The school may want to consider adding additional cameras or utilize camera lenses that are 90°, 180°, 270°, or 360° with higher megapixels when additional funding is available.
		
		
		
		
		

## On-Site Assessment for Downtown High School

Question	Answer	Comments
1.6.3 Stairwells	Yes	<p>The staff stated most of the end stairwell were only being used for Emergency exits only, but can be this could be and area where students might go to vape. Student have be caught opening the lower level exit door to let other in off the street.</p> <p>The stairwells did have some camera coverage which showed what the staff referred to as a cross view. There were limited view of activities on the stairwell landings themselves. This led to many opportunities for areas students may vape while in the stairwells.</p>

## On-Site Assessment for Downtown High School

Question	Answer	Comments
    	Yes	There were some alcoves covered by a video camera.
<p><b>1.6.4 Alcoves</b> (Clarification: An alcove is a recessed area adjoining another room or hallway/space that is not separated by doors or windows and may or may not have a lower ceiling height.)</p>		

## On-Site Assessment for Downtown High School

Question	Answer	Comments
		
		
		
1.6.5 Classrooms	Yes	The staff stated that pre-COVID there were on average 20 student per classroom.

## On-Site Assessment for Downtown High School

Question	Answer	Comments
 <p>05/10/2021 07:54</p>		 <p>05/10/2021 08:31</p>
 <p>05/10/2021 08:36</p>		 <p>05/10/2021 08:54</p>
 <p>05/10/2021 08:58</p>		
1.6.6 Gymnasiums	Yes	The staff member stated the gym is kept locked. The rear door in the gym provides access to a city street and possible vaping area.

## On-Site Assessment for Downtown High School

Question	Answer	Comments
		
		
		

## On-Site Assessment for Downtown High School

Question	Answer	Comments
1.6.7 Auditoriums	N/A	The school doesn't have an Auditorium. The stage is in the multi-purpose room that doubles the Cafeteria.
1.6.8 Stage areas	Yes	The stage is in the Multi-purpose room that is also the Cafeteria. There are no dressing room.
		
1.6.9 Cafeteria	Yes	Multi-purpose room that is also the Cafeteria. The restrooms in this area are only used during student assemblies.
		
1.6.10 Outdoor areas	Yes	The analyst observed numerous outdoor areas where students are allowed to congregate. Many of these area are outside of the current camera placement. If left unsupervised many of these areas would provide concealment for students to vape or engage in other student code of conduct violations.

On-Site Assessment for Downtown High School

Question	Answer	Comments
		
		
		

## On-Site Assessment for Downtown High School

Question	Answer	Comments
<b>1.6.11</b> Rooftop areas (Clarification: In this usage, "rooftop areas" refer to rooftops, covered walkways and other elevated areas where students have attempted to vape by climbing to the areas.)	No	These doors are kept locked, but if access is gained it will lead to a ladder and additional access to the highest level of the roof.
		
<b>1.6.12</b> Areas off of but close to school property during school hours (Clarification: In this usage, these include areas just off school property such as vacant lots, business parking areas, city streets etc. where students have been vaping.)	Yes	

## On-Site Assessment for Downtown High School

Question	Answer	Comments
		
		
<b>1.6.13</b> Leaving school to vape at other off-campus locations while truant from school.	Yes	

## On-Site Assessment for Downtown High School

Question	Answer	Comments
    		
1.6.14 On school buses	No	
1.6.15 Other		<p>The students have access to these areas for lunch and other supervised activities, ut the school has limited staff to provide supervision. The exercise room is only opened under adult supervision. The staff reported vaping occurs at lunch it happens in the garden area and the outside courtyard.</p>

## On-Site Assessment for Downtown High School

Question	Answer	Comments
		
		
		

## 7. Your observations

Question	Answer	Comments
----------	--------	----------

## On-Site Assessment for Downtown High School

Question	Answer	Comments
1.7.1 Did you identify any unique options for consideration for this school/district to enhance vape prevention and mitigation measures based on your experience and training?	No	These are some vaping devices that staff has taken from student vaping or planning to vape.

## Q1

Name of school district:

San Francisco Unified School District

## Q2

Name of school or other educational facility:

Downtown High School

## Q3

Address:

693 Vermont St, San Francisco CA 94107

## Q4

Date / Time

05/10/2021

Date of site visit:

## Q5

Date / Time

07:40 AM

Time arrived:

## Q6

Analyst(s):

Russell Bentley

## Q7

Campus inspection escort(s)/school personnel:

James Osomo-Head Counselor &amp; Ellen Wong-Principal

---

Page 2

**Q8**

What is the average pre-COVID number of students attending your school or educational programs?

175

---

**Q9**

Counting students who participate in person on a limited number of days per week or month, what is the average number of students attending your school or educational programs in person at present?

10

---

**Q10**

Do you think any of the following make it difficult to detect students using e-cigarette/vape products on school grounds? Please check all that apply:

E-cigarette/vape products are discreet in appearance.,

School staff are not aware of how to recognize the various types of e-cigarette/vape products available.

,

Students can vape quickly in contrast to the time it takes for them to smoke cigarettes.

,

It is difficult to pinpoint which students are using e-cigarette/vaping products.

,

Vapor cloud dissipates quickly.,

Vaping does not produce the odors of cigarettes which makes it hard to detect in the air and on student's clothing.

---

**Q11**

Does the school have a written policy, rule or prohibition which prohibits the use of e-cigarettes/vaping on school ground?

Yes,

Comments:

The staff reported the policy is in the student handbook.

---

---

Page 3

**Q12**

Is the written prohibition also communicated by signage and/or posters?

---

No

**Q13** **Yes,**  
 Is the written prohibition communicated in languages other than English? **Comments:**  
 The staff reported it is available in 5 other languages.

---

**Q14** **Yes**  
 Is the written prohibition included in the student handbook or code of conduct? (Clarification: These are the written guidelines spelling out rules for student conduct by these or any other names.)

---

Page 4

**Q15** **Yes**  
 Does the school use in-school suspension as part of the approach to address violations?

---

**Q16** **No**  
 Does the school use out-of-school suspension as part of the approach to violations?

---

**Q17** **No**  
 Does the school use citations issued by law enforcement as part of the approach to violations?

---

**Q18** **Yes**  
 Does the school use restorative practices as part of the approach to address student violations? (Clarification: "Restorative practices" by this or any other name involves alternative approaches designed to address inappropriate student conduct while reducing or complimenting the use of traditional punitive measures such as suspensions, alternative placement and referral to the criminal justice system.)

---

**Q19** **Yes**  
 Does the school use social emotional learning approaches as part of the approach to address violations? (Clarification: "Social emotional learning approaches" by this or any other name involves the approaches which help students and adults develop and apply knowledge, concepts and skill sets needed to manage emotions and make appropriate choices relating to behavior conduct and communications with others. These approaches are designed to help school officials improve student conduct.)

---

**Q20**

Does the school use a mandatory vaping awareness effort for violations? (Clarification: "Mandatory vaping awareness efforts" by this or any other name involves a formalized approach designed to increase awareness of students regarding the health consequences and other negative impacts and dangers that can result from vaping. Mandatory in this usage means participation is required for students who violate vaping policies/rules.)

**No,**

Comments:

The staff stated students are referred to the school nurse but it is not mandatory.

**Q21**

Does the school use vaping cessation programs for students who violate vaping policies/rules? (Clarification: "Vaping cessation programs" by this or any other name involves the programs designed to help and support students who are trying to stop vaping.)

**No**

Page 5

**Q22**

Have you encountered any barriers, or do you have concerns about implementing this approach?

Respondent skipped this question

Page 6

**Q23**

Does the school provide students with awareness training on vaping issues?

**No**

Page 7

**Q24**

Is the training required for all students?

Respondent skipped this question

**Q25**

Is the training conducted as a classroom activity?

Respondent skipped this question

**Q26**

Is the training delivered via student assembly?

Respondent skipped this question

**Q27**

Respondent skipped this question

Is the training conducted at least one time each year?

**Q28**

Respondent skipped this question

Is the training also conducted in an online format?

**Q29**

Respondent skipped this question

Have you encountered any barriers, or do you have concerns about delivering awareness information to students?

Page 8

**Q30**

No

Does the school provide school personnel with awareness training on vaping issues?

Page 9

**Q31**

Respondent skipped this question

Is the training required for all current employees?

**Q32**

Respondent skipped this question

Is the training provided during the onboarding process for new personnel?

**Q33**

Respondent skipped this question

Is the training provided to substitute teachers?

**Q34**

Respondent skipped this question

Is the training conducted in an online format?

**Q35**

Respondent skipped this question

Does the training provide information on how to recognize specific behaviors that are often associated with vaping? (Clarification: In this usage, "specific behaviors" refers to observable physical actions and reactions that are often associated with vaping activities.)

**Q36**

Respondent skipped this question

Have you encountered any barriers, or do you have concerns about delivering staff development to school personnel?

Page 10

**Q37**

No

Does the school provide parents/caregivers with awareness training opportunities on vaping issues?

Page 11

**Q38**

Respondent skipped this question

How many times a year do you offer this type of training?

**Q39**

Respondent skipped this question

Is the training conducted in an online format?

**Q40**

Respondent skipped this question

Have you encountered any barriers, or do you have concerns in delivering this information to parents/caregivers?

Page 12

**Q41**

Yes,

Comments:

Does the school have an anonymous reporting mechanism such as a phone application, e-mail and/or hotline so students can report concerns about vaping? (Clarification: In this usage, "anonymous reporting mechanism" includes formal and structured ways which allow students to anonymously bring concerns about vaping to the attention of school officials. This type of reporting mechanism can typically also be used for students to report other types of concerns such as bullying, threats, etc.)

The district has a hotline student can report any issue to.

Page 13

**Q42****No**

Is the reporting system communicated by signage and/or posters?

---

**Q43****Yes,**

Is the reporting system included in the District's website?

Comments:

It is also located in the online version of the student handbook.

---

**Q44****Yes**

Is the reporting system described in the student handbook/code of conduct?

---

**Q45****No**

Have you encountered any barriers, or do you have any concerns in implementing this measure?

---

Page 14

**Q46****Yes**

Does the school limit number of students allowed in restroom at one time?

---

Page 15

**Q47**

How does the school limit the number of students allowed in restroom at one time? Please check all that apply:

**Briefing/training of staff on how to implement the measure.**

,

**Briefing students on the school's requirements for the measure.**

,

**Assigned staff.**

---

**Q48****Yes,**

Have you encountered any barriers, or do you have concerns in implementing this measure?

Comments:

The staff advised these measures can only be done if staffing allows.

---

Page 16

**Q49****No**

Does the school limit amount of restroom time for students?

---

Page 17

**Q50****Respondent skipped this question**

How does the school limit amount of restroom time of students? Please check all that apply:

---

**Q51****Respondent skipped this question**

Have you encountered any barriers, or do you have any concerns in implementing this measure?

---

Page 18

**Q52****No**

Does the school use an electronic hall pass system? (Clarification: In this usage, "an electronic hall pass system" refers to either a proximity card or phone application-based system which helps teachers, students and administrators more easily and effectively coordinate, verify and track the use of hall passes.)

---

Page 19

**Q53****Respondent skipped this question**

Does the system provide rapid electronic verification that a student has a valid hall pass? (Clarification: In this usage, "rapid electronic verification" means the system allows staff to rapidly verify that a student has been issued a valid and current hall pass.)

---

**Q54****Respondent skipped this question**

Does the system provide automatic electronic logging all passes granted? (Clarification: In this usage, "automatic electronic logging" means that once a hall pass is issued, the hall pass and student information is automatically entered into the system to allow staff to verify that a student has been issued a valid and current hall pass.)

---

**Q55**

Respondent skipped this question

Does the system provide the ability for staff to spot patterns where multiple students are issued hall passes at the same time which could help detect students who are meeting to vape? (Clarification: In this usage, the system allows authorized staff to rapidly and easily spot patterns which indicate that multiple students have been issued hall passes in the same time frame which could indicate students who may be obtaining hall passes in order to meet and engage in vaping activities.)

---

**Q56**

Respondent skipped this question

Does the system provide a feature that allows staff to track student movement/location electronically in real time to spot abuse of hall passes? (Clarification: In this usage, the system allows authorized staff to determine if one or more students who have been issued hall passes attempt to travel to an area of the school that does not match the destination the hall pass(es) authorize the student(s) to travel to.)

---

**Q57**

Respondent skipped this question

Does the system allow members of the school leadership team to spot patterns of teachers who issue an unusually high number of hall passes? (Clarification: In this usage, the system makes it much easier for members of the school's leadership team to identify situations where teachers are granting an unusually high number of hall passes.)

---

Page 20

**Q58**

No

Does the school have a written student supervision plan? (Clarification: In this usage, "a student supervision plan" is an approach that identifies how, when and where specific approaches to student supervision will be utilized.)

---

**Q59**

No,

Comments:

Does the school provide school staff with any formal training on student supervision techniques?

The staff reported only administrators, security, and counselors supervise students

---

Page 21

**Q60**

Respondent skipped this question

Is there any video used in this training?

**Q61**

Respondent skipped this question

Is this training provided in an online format?

**Q62**

Respondent skipped this question

Is this training provided in live training sessions?

**Q63**

Respondent skipped this question

Is this training required for all current school staff?

**Q64**

Respondent skipped this question

Is the training on student supervision techniques part of the onboarding process?

**Q65**

Respondent skipped this question

Are substitute teachers required to complete training on student supervision techniques?

Page 22

**Q66**

No

Does the school use visual charts/floorplans/diagrams for student focus groups to identify “hotspots” and times of increased activity? If yes, is information resulting from the activity used to identify opportunities for improvement in student supervision, camera placement and/or vape detection sensor placement? (Clarification: In this usage, “visual charts/floorplans/diagrams” refers to some form of printed visual depiction of the building(s) and campus so focus group participants can more easily and accurately identify areas where hotspots are located.)

**Q67****No**

Does the school use GIS mapping software for student and faculty focus groups to identify “hotspots” and times of increased activity? If yes, is information resulting from the activity used to identify opportunities for improvement in student supervision, camera placement and/or vape detection sensor placement? (Clarification: In this usage, “GIS mapping software” refers to some form of electronic visual depiction of the building(s) and campus so focus group participants can more easily and accurately identify areas where hotspots are located.)

**Q68****No**

Has the school assigned staff (i.e., teachers, campus monitors, hall monitors, campus safety officers) to student restroom duty to prevent problematic behaviors?

Page 23

**Q69****Respondent skipped this question**

How many personnel are assigned full-time (more than 80% of work time) to perform the duty?

**Q70****Respondent skipped this question**

How many personnel are assigned part-time (less than 80% of work time) to the duty?

**Q71****Respondent skipped this question**

Are these personnel repurposed from other positions leaving those positions vacant?

**Q72****Respondent skipped this question**

Have you encountered any barriers, or do you have any concerns in implementing this measure?

Page 24

**Q73****No**

Has the school increased staffing for student supervision?

Page 25

**Q74**

Respondent skipped this question

How many personnel are assigned full-time (more than 80% of work time) to the duty?

---

**Q75**

Respondent skipped this question

How many personnel are assigned part-time (less than 80% of work time) to the duty?

---

**Q76**

Respondent skipped this question

Are these personnel repurposed from other positions leaving those positions vacant?

---

**Q77**

Respondent skipped this question

Have you encountered any barriers, or do you have any concerns in implementing this measure?

---

Page 26

**Q78**

No

Does the school have staff who serve solely or primarily (more than 80% of work time) as vaping prevention and mitigation coordination personnel? (Clarification: In this usage, the term refers to the staff member(s) whose job duties are focused on performing and coordinating vape prevention measures at the school.)

---

Page 27

**Q79**

Respondent skipped this question

How many personnel are assigned full-time (more than 80% of work time) to the duty?

---

**Q80**

Respondent skipped this question

How many personnel are assigned part-time (less than 80% of work time) to the duty?

---

**Q81**

Respondent skipped this question

Are these personnel repurposed from other positions leaving those positions vacant?

---

**Q82**

Respondent skipped this question

Are these personnel also required to provide these services at any other schools (shared by multiple schools)?

---

**Q83**

Respondent skipped this question

Have you encountered any barriers, or do you have any concerns in implementing this measure?

---

Page 28

**Q84**

No

Do employment/union contracts or agreements prohibit or limit the utilization of teachers and/or other staff for student supervision duties? If yes, how do you provide the level of supervision that would be provided if teachers and other staff could be utilized for supervision duties?

---

**Q85**

No

Does the school have "Walking Only" zones? If yes, have you encountered any barriers, or do you have any concerns in implementing this measure?(Clarification: In this usage, a "Walking Only zone" is a designated physical space/area where students are allowed to move through but prohibited from stopping, gathering or loitering during specific time periods.)

---

**Q86**

Yes,

Comments:

Does the school have areas designed as "No Go" zones during certain times of day? If yes, have you encountered any barriers, or do you have any concerns in implementing this measure?(Clarification: In this usage, a "No Go zone" is a designated physical space/area where students are not allowed to enter or pass through during specific time frames.)

---

The staff stated the north stairwell, teachers lounge, and the stairwells near the cafeteria and gym are designated as "no go" zones.

---

Page 29

**Q87****No**

Does the school designate some hallways and/or stairwells as "One Way" to reduce jamming of hallways during peak times of movement? If yes, have you encountered any barriers, or do you have any concerns in implementing this measure?(Clarification: In this usage, one-way hallways and/or stairwells are areas where students are instructed to travel only in one direction to reduce congestion and to make it easier for staff to more effectively supervise students in-person and/or via cameras during periods of increased student movement.)

---

Page 30

**Q88****Yes**

Does the school have surveillance cameras?

---

Page 31

**Q89****Yes**

Are cameras are used to investigate allegations/reports of vaping?

---

**Q90****No**

Are cameras used to detect vaping incidents through periodic live observation of camera feed?

---

**Q91****No**

Does the school have any smart cameras with analytic software? (Clarification: Smart cameras are cameras that are designed to support additional functions besides simply recording images. These can include but are not limited to video and audio analytics as well as capabilities such as fire detection, smoke detection, etc.)

---

Page 32

**Q92****Respondent skipped this question**

Does the school use dwell time/loitering detection software? (Clarification: Analytic which detects one or more persons loitering in camera view once a minimum time frame such as 15 seconds has been reached.)

---

**Q93**

Respondent skipped this question

Does the school use “No go” zone detection?  
(Clarification: Analytic which detects one or more persons who enter an area designated in the field of view as a “No go” zone.)

---

**Q94**

Respondent skipped this question

Does the school use tracking capability to reduce the time required to track, locate and identify students suspected of vaping? (Clarification: The ability to click on or “box” a specific physically recognizable feature such as a green baseball cap, yellow jacket or blue tennis shoes and which allows authorized personnel to rapidly track the object (and thus the person) as they move through the school – in the past, present and as they move.)

---

Page 33

**Q95****No,**

Comments:

Is camera image resolution adequate to recognize people from video footage so they can be properly identified if they are observed vaping via cameras?

The staff reported the cannot see faces clearly but can identify a student by what they were wearing.

---

Page 34

**Q96****No**

Has the school installed any vape detectors? (Clarification: In this usage, the term “vape detectors/sensors” refers to electronic devices which in a similar manner to smoke detectors, send an alert (typically within 15 seconds) when someone uses a vape device in a space.)

---

Page 35

**Q97**

Respondent skipped this question

Please select the areas where vape detectors are installed:

---

**Q98**

Respondent skipped this question

If your school has cameras, do the cameras support vape detectors? (Clarification: In this usage, cameras are located in a manner to allow staff to help identify who was vaping (in a public space such as a stairwell) or to identify who has entered and departed from private spaces such as restrooms and locker rooms.)

**Q99**

Respondent skipped this question

Do you have any negative feedback on the effectiveness of vape detectors in your school? (Clarification: We would like to identify any problems school officials may have had with the effectiveness of vape detectors. If problems are described, please try to determine what the problems were and if attempts to address them were made. For example, there were some software problems which caused false alarms in some early models and this was addressed with updated software.)

**Q100**

Respondent skipped this question

Do you have any positive feedback on the effectiveness of vape detectors in your school? (Clarification: We would like to not only identify positive examples of effectiveness, but to try to identify why the use of vape detectors was effective to develop more effective strategies for their use if, when and where they are determined to be a suitable prevention and mitigation measure.)

Page 36

**Q101**

Based on incidents where students have been caught vaping, students have reported vaping occurs and/or student survey data, where have students been vaping? Please check all that apply:

Hallways,

Stairwells,

Classrooms,

Outdoor areas,

Areas off of but close to school property during school hours (Clarification: In this usage, these include areas just off school property such as vacant lots, business parking areas, city streets, etc. where students have been vaping.)

,

Leaving school to vape at other off campus locations while truant from school

**Q102**

Which of the following time(s) of day when students have been caught vaping, students have reported vaping occurs and/or student survey data indicates students have been vaping? Please check all that apply:

**Before school hours -before the start of the school day – prior to homeroom/supervision room or first period classes.**

,

**During morning arrival - after the campus is open but before school hours.**

,

**During instructional periods – while some or all students are in classes.**

,

**During passing times/class changes – when most or all students are moving from one classroom/activity to another.**

,

**During lunch periods – during any regularly scheduled lunch period.**

,

**During afternoon dismissal – when the majority of students are departing the campus after school hours and regular instructional periods have concluded for the day.**

,

**During after-school hours – school-related activities/programs that begin once regularly scheduled instructional periods have concluded for the day or on weekends.**

**Q103**

In some instances, measures to prevent student misconduct in specific areas can result in students finding new locations or to continue to engage in the activity. We would like to identify these types of areas so they can be addressed in the prevention and mitigation plan. Based on your experience and knowledge of the campus, where are students likely to try to vape if effective prevention measures are implemented making it difficult to vape without detection in the areas you identified? Please check all that apply: (Clarification: This includes anticipated increases in vaping activities in areas indicated above for current vaping activity locations.)

Hallways,

Stairwells,

**Alcoves** (Clarification: In this usage, an “alcove” is a recessed area adjoining another room or hallway/space that is not separated by doors or windows and may or may not have a lower ceiling height.)

,

Classrooms,

Outdoor areas,

**Areas off of but close to school property during school hours** (Clarification: In this usage, these include areas just off school property such as vacant lots, business parking areas, city streets, etc. where students have been vaping.)

,

**Leaving school to vape at other off campus locations while truant from school**

,

**They will quit vaping at school**

**Q104**

Are there any unique concerns or challenges relating to methods used by students to vape on campus without being detected?

Yes,

If yes, please explain.:

The staff stated students will vape under a vent and blow the smoke into. They will use their backpacks to blow the smoke in as well. The staff also reported training on identifying vaping devices is a challenge.

**Q105**

Does the school use nicotine detection swabs to help identify students who have been vaping when it is not clear which student was vaping in restrooms, etc.?

(Clarification: In this usage, “nicotine detection swabs” are a field test used by school and/or law enforcement officials to determine if particles from vaping are present on a student’s hands and/or clothing when they are suspected of vaping.)

No

Page 37

**Q106**

Are vape detection swabs used only when individual students are suspected to have been vaping?

Respondent skipped this question

**Q107**

Respondent skipped this question

Is there a written policy or guideline on the use of nicotine detection swabs?

---

**Q108**

Respondent skipped this question

Have you encountered any barriers, or do you have any concerns in implementing this measure?

---

Page 38

**Q109**

No

Are field tests to detect marijuana and/or other drugs used to test confiscated items when e-cigarettes, vaping devices are confiscated from students? (Clarification: Field tests are the types of tests used to determine if controlled substances are likely present – a laboratory test is typically required for positive identification in a criminal trial for possession of controlled substances.)

---

Page 39

**Q110**

Respondent skipped this question

Do law enforcement officers conduct field tests?

---

**Q111**

Respondent skipped this question

Is there a written policy or guideline on the use of field tests of confiscated items for marijuana and/or other drugs?

---

**Q112**

Respondent skipped this question

Do you encounter any barriers or have any concerns in implementing this measure?

---

Page 40

**Q113**

N/A,

Comments:

The staff reported the school does not have team sports.

---

Does the school conduct nicotine tests and/or random nicotine tests for students as a requirement to participate in extracurricular activities? (Clarification: Random tests are tests conducted as a requirement of participation after a student is accepted for participation on an extracurricular team or program. Extracurricular activities include but are not limited to athletics teams, cheerleading, debate, and other optional activities available to students.)

---

Page 41

**Q114**

Respondent skipped this question

Are students screened before being allowed to participate in the extracurricular activity?

**Q115**

Respondent skipped this question

Are students screened with random testing after being selected to participate in extracurricular activities?

**Q116**

Respondent skipped this question

Is there a written policy on how to conduct nicotine testing for extracurricular activities?

**Q117**

Respondent skipped this question

Is there a written policy or guideline on the consequences/supports for violations?

**Q118**

Respondent skipped this question

Have you encountered any barriers, or do you have any concerns in implementing this measure?

Page 42

**Q119**

None of the above,

Does the school use any of the following measures to try to prevent and detect vaping on school buses? Please check all that apply:

Comments:

The staff member reported none of their students are bused to campus using the contracted (yellow) school bus.
